Your child is your most valuable cargo, so it is important to buy her a high-quality car seat that will keep her safe in the event of an accident. The good news is that you don't have to empty your checking account to get a high quality car seat for your toddler. Graco car seats are well made, meet all relevant safety standards, and are surprisingly affordable - you can't get much better than that. But what kind of Graco car seat do you need? This depends on a number of factors, including your child's age, whether your car has LATCH tether points and if you want a car seat you can adjust as your child grows. At BestReviews, we have done extensive research on the Graco car seat to bring you this in-depth shopping guide that should answer any questions you have on the subject. If you are willing to buy, take a look at our best selections in the product list above. Make sure your car seat is easy to keep clean. You should be able to remove the fabric part of the seat and wash it in the car. Consider buying a second set of car seat covers. This means that you have a spare if one set is in the wash. Make sure your Graco car seat is tightly installed. It should not move more than one inch forward, backwards or side to side. Choose a car seat that fits in your car. While Graco car seats fit into the vast majority of cars, there may be some exceptions, so be sure to check before you buy. How will I know when my child is getting too big for her current car seat? A. If your toddler appears cramped but still well within the maximum weight and height limits, you may just need to adjust the harness or pull some of the removable padding. What is the best position to install a Graco car seat? A. The safest place to install a car seat is in the rear middle seat of the vehicle. However, it is not always possible to install a car seat there because some vehicles do not have LATCH anchors or proper seat belts in the center of the seat. In this case, the next safe option is either the rear left or the rear right. Never place your child's car seat in the front passenger seat because it is the least secure position. How do I know that I have safely installed my child's Graco car seat? A. The first step to installing the Graco car seat correctly and safely is to read the manual carefully and follow the instructions for installing the letter. If you have any problems, or you just want someone in the know to double-check the installation, you can find child safety passenger technicians across the U.S. who have received training under the National Certification Program children of passengers. When it comes time to choose a car seat it is the first most important to check the car seat guidelines to make sure you are adhering to the AAP recommendations. One of the best car seats available today is the Britax Marathon ClickTight Convertible Car Seat, which can be used by both the rear and forward car seat, depending on your child's height and weight. If your yours The one weighs 5 to 40 pounds and has a shoulder height of 7.6 to 18.65 inches, they can use the seat in the back position, and once they are 20 to 65 pounds and the shoulder height is 12 to 18.65 inches, it can be facing forward. This Britax car seat has a ClickTight installation process that makes it as simple as bucking your seat belt, and there are seven recline positions to ensure your child is comfortable. You will never have to reread the harness since it has 14 positions and two buckle positions can be adjusted at the touch of a button and will remain comfortable as your child grows. In addition, the steel frame and blow-absorbing base work combined with a deep foam lining shell to keep your toddler safe, no matter what happens. Some parents say the ClickTight system can be a little tricky to use in some cars such as sedans, but overall, most agree that it is a great car seat that will accommodate growing children and keep them safe as you go about your daily business. Recent recommendations from the National Highway Traffic Safety Administration state that children must drive in a car seat or booster until they are 12 years old or meet the specific height and weight requirements set out by each state. Make sure your child is securely strapped for each car to drive with the proper car seat. Prices can and should only be used as a general guide. All babies, toddlers and children must drive in the proper type of car or steering seat until they reach a certain height and weight. Specific car seat rules vary by state, so contact your state's Department of Motor Vehicles or local governments to find this information. However, the National Highway Traffic Safety Administration offers its own age guidelines for children under 12. This table provides a common timeline to help you decide what type of seat your child needs, depending on his or her age. Transition periods will vary depending on your child's height and weight and the specific laws of your state. Rear-facing Front-facingBoosterSeatbeltTypes car seats The right type of car seat for your child based on the latest age, weight and height guidelines. Just in the back. These car seats are designed to accommodate in your car face back and are designed for newborns, up to two three years. Convertible seats. These seats can be converted into rear and front seats, depending on your child's needs. This can be a cost-effective way to get more efficient use from one location. Booster seats. Booster seats are both backless and high back, but the concept is the same: support your child so that he or she can properly use the seat belt. All-in-one places. Places. Generally more expensive, these models can save money in the long run, as they are converted into every type of seat your child will need. How long is the car seat good? Most car seats expire six years after the date of their manufacture. Look for the expiration date printed on the manufacturer's label on the side or base side of the seat. If you can't find it, call the manufacturer to be sure. Car seats expire because plastic, nylon and other materials used to make them can wear out over time, potentially putting your child at risk in the event of an accident. When buying a computer car seat, check the expiration date to see how much benefit you will get from it before it expires. Your money may be better spent on a new location, especially if you are looking into an all-in-one model for long-term use. Consider these important features when buying a car seat: Price. New car seats and boosters range in price from about \$30 to \$300 or more, depending on the type, brand and model. Type. Choose the right type of car seat for your child's age, height and weight. Investing in a more expensive convertible model can be cost-effective in the long run. Otherwise, plan to shop for a new place again in a few years. Restrictions on height and weight. Check to make sure that the place you are buying is rated safely to place your child, based on his or her height and weight. LATCH connectors. All cars built after 2002 are equipped with LATCH anchors (lower anchor and ropes for children). LaTCH connectors on the car seat are attached to these anchors. Make sure your car is compatible with your car seat's LATCH system. The harness system. All car seats, with the exception of some booster seats, have an adjustable seat belt system that you will need to adjust as your child grows. Style, design and fit harness can vary depending on the models, so compare some options to find your favorite setup. Covers and pillows. Some models are equipped with removable lids, pillows and pads to improve comfort. Check what parts and accessories come with the seat you are looking at. Before you hit the road, check to make sure your car and car seat are safe and safe to drive. These are just a few basic safety tips to keep in mind: Always read the instruction that came with your car or steering seat before using and installing. Make sure you use the right type of car seat and position for your child's age, weight and height. Never unload the car seat in front of the airbag. Avoid placing blankets or heavy winter coats in the car seat with your child, as these items can prevent harness safety from properly in an accident. Always buckle your child's snug and proper. Check the expiration date of your car seat, especially when using a hand-me-down. Not and reuse the car seat that was in the accident. A properly mounted car seat is one of the most important parts of your car to drive with your toddler. Compare some of the best options and be sure to purchase the right type for your age, weight and height. Ready to buy? Compare the top carSearch for a more needed baby? Compare the top high chairs or use our guide to find the right stroller. We conducted an online study to compare the price, type, size and general features of some of the most popular car seats and booster seats currently available. We also took into account our personal experience and third-party product reviews. Some stores such as Target and Walmart offer trade-in incentives if you bring your place with expired expiration date and buy a new one. Otherwise, you can recycle the old car seat by removing the fabric and upholstery and recycling the plastic and metal parts. Use a sponge or cloth with a little soap for utensils or other baby cleaning products to wipe the straps. Try to avoid soaking them wet. Towel or air dry when done. No. There are usually a limited number of car seats that will fit into the stroller and this should usually be of the same brand. A list of compatible car seats should be available online or in the user's guide for your stroller. Was this content useful to you?
